Claims 1-18, as a result of the preliminary amendment filed December 10, 2003, are pending.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "reaction piston (having) a diaphragm... arranged between the active reaction chamber and the passive reaction chamber" of claim 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to anticipate or properly render obvious a power steering system in which a rotary slide valve includes a centering mechanism, defining an active pressure reaction chamber to which is fluidly connected a fluid pressure pulse dampening mechanism in the forms of a "piston" (claims 1-9 and 11-18) or "diaphragm" (claim 10) to damped or lesson mechanical pulses at the steering wheel to enhance comfort for the driver.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

This application is in condition for allowance except for the above formal matters concerning the claimed "diaphragm". Should applicant decide to retain claim 10, appropriate measures must be taken concerning a figure illustrating the "diaphragm" as well as any appropriate amendments to the "Brief Description" and "Detailed Description" sections of the specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

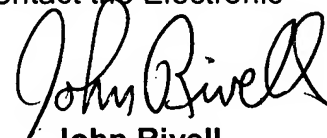

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
